June 2023, the town of Searchlight used 3.9 million gallons of water. A reduction of 2 million gallons from this time last year.

The water system remains in stable condition with no service line or mainline breaks or leaks.

Some customers may have received (or will receive) text messages or robocalls from LVVWD regarding potential leaks at their homes. These are legitimate communications from LVVWD to proactively notify customers if we see continuous flow on the meter.

A fire flow test will be conducted next week. This will not cause any water interruptions but could cause sediment in the pipes. Flush your largest water fixture 3 to 5 minutes or until the water clears.
