Form SS-PER-021-00: Nonroad Engine Declaration for Stationary Source Air Quality Permitting

Source Name: _____ Source ID #: _____

Source Address: _____ City: _____ ZIP: _____

I, the undersigned, with responsibility for _____ (source name), attest to the best of my knowledge and belief that the engine(s) listed below did operate at the above-named facility, and will continue to operate at that facility, in a manner consistent with the definition of a *nonroad engine* in accordance with 40 CFR Part 1068.30.

Nonroad engine means: [40 CFR Part 1068.30]

(1) Except as discussed in paragraph (2) of this definition, a nonroad engine is an internal combustion engine that meets any of the following criteria:

- (i) It is (or will be) used in or on a piece of equipment that is self-propelled or serves a dual purpose by both propelling itself and performing another function (such as garden tractors, off-highway mobile cranes and bulldozers).*
- (ii) It is (or will be) used in or on a piece of equipment that is intended to be propelled while performing its function (such as lawnmowers and string trimmers).*
- (iii) By itself or in or on a piece of equipment, it is portable or transportable, meaning designed to be and capable of being carried or moved from one location to another. Indicia of transportability include, but are not limited to, wheels, skids, carrying handles, dolly, trailer, or platform.*

(2) An internal combustion engine is not a nonroad engine if it meets any of the following criteria:

- (i) The engine is used to propel a motor vehicle, an aircraft, or equipment used solely for competition.*
- (ii) The engine is regulated under 40 CFR part 60 (or otherwise regulated by a federal New Source Performance Standard promulgated under section 111 of the Clean Air Act (42 U.S.C. 7411)). Note that this criterion does not apply for engines meeting any of the criteria of paragraph (1) of this definition that are voluntarily certified under 40 CFR part 60.*
- (iii) The engine otherwise included in paragraph (1)(iii) of this definition remains or will remain at a location for more than 12 consecutive months or a shorter period of time for an engine located at a seasonal source. A location is any single site at a building, structure, facility, or installation. For any engine (or engines) that replaces an engine at a location and that is intended to perform the same or similar function as the engine replaced, include the time period of both engines in calculating the consecutive time period. An engine located at a seasonal source is an engine that remains at a seasonal source during the full annual operating period of the seasonal source. A seasonal source is a stationary source that remains in a single location on a permanent basis (i.e., at least two years) and that operates at that single location approximately three months (or more) each year. See § 1068.31 for provisions that apply if the engine is removed from the location.*
