The work for the above referenced project has been completed. Please see the attached for all project related information.

The purpose of the above referenced project was:

The purpose of this project was to continue the development and update of the Nevada Natural Heritage Program (NNHP) biological datasets for sensitive species within Clark County. Funding was provided to NNHP to coordinate data management of sensitive species addressed under the MSHCP, coordinate data transactions in and out of NNHP's central repository directly with Federal, state, Clark County, and other MSHCP participants, to provide periodic data deliveries to the County in GIS format, and to create custom database or GIS data sets and deliver to County.

The major accomplishment or findings of this project include:

- Added 1,647 new species observations within Clark County into the NNHP database.
- Delivered custom datasets providing support for Las Vegas Buckwheat analysis, sensitive plant habitat modeling and for permit amendment.
